

edp

Leading the energy transition to create superior value

About EDP

EDP (Euronext: EDP) is a global energy company present in Europe, North America, South America and Asia Pacific. Headquartered in Lisbon, EDP is the largest producer, distributor and supplier of electricity in Portugal. The company operates across energy generation and supply, including a total installed capacity of 29 GW, networks of 376 thousand km and over 9 million clients.

The group is committed to becoming carbon free by 2025 and all-green by 2030, a global ambition that scales EDP's role and accelerates its sustainable growth over the longer term. EDP is recognised as the world's most sustainable energy utility company with an ambition to be Net Zero by 2040, under the new Science Based Targets initiative (SBTi) Net-Zero Standard.

Accolades

EDP commits to meeting strict environmental performance, social impact and governance (ESG) standards. Our sustainability practices are recognised by S&P Dow Jones Sustainability Index for 14 consecutive years and we have kept our position as the most sustainable electricity company.

About EDP Renewables

We have renewable assets across these continents

EDP Renewables (Euronext:EDPR) is the renewables platform of EDP and a global leader in renewable energy development. Its business encompasses onshore wind, distributed and large-scale solar, offshore wind (through a 50/50 joint venture – Ocean Winds) and complementary technologies to renewables, such as hybridisation, storage and green hydrogen.

With headquarters in Madrid and leading regional offices in Singapore, São Paulo and Houston, EDPR has a robust development portfolio of 16.6 GW top-level assets and market-leading operating capacity in renewable energies across over 20 international markets.

In Asia Pacific, EDPR has a pan-regional presence of more than 1.6 GWp of committed clean energy capacity. Headquartered in Singapore, the company has a clear strategy to provide access to clean, reliable and affordable energy for the Asia Pacific region. We aim to increase our renewables capacity up to 5 GW by 2030 and lead the energy transition in the region.

Our Business Areas in Asia Pacific

Centralised Generation

- Ground-mounted grid connected solar energy systems (e.g. solar farms)
- Floating solar energy systems (lakes/ reservoirs and open sea)
- Wind energy systems (onshore and offshore)

Distributed Generation Solar

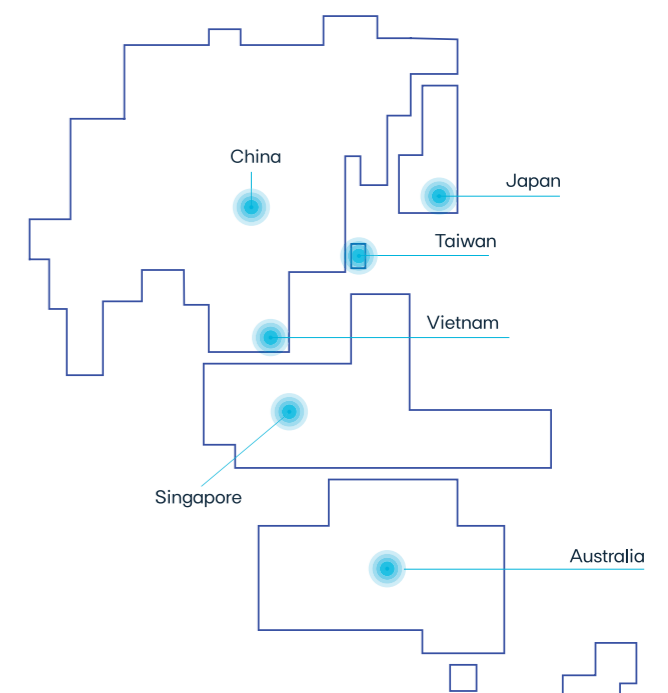

- On rooftops

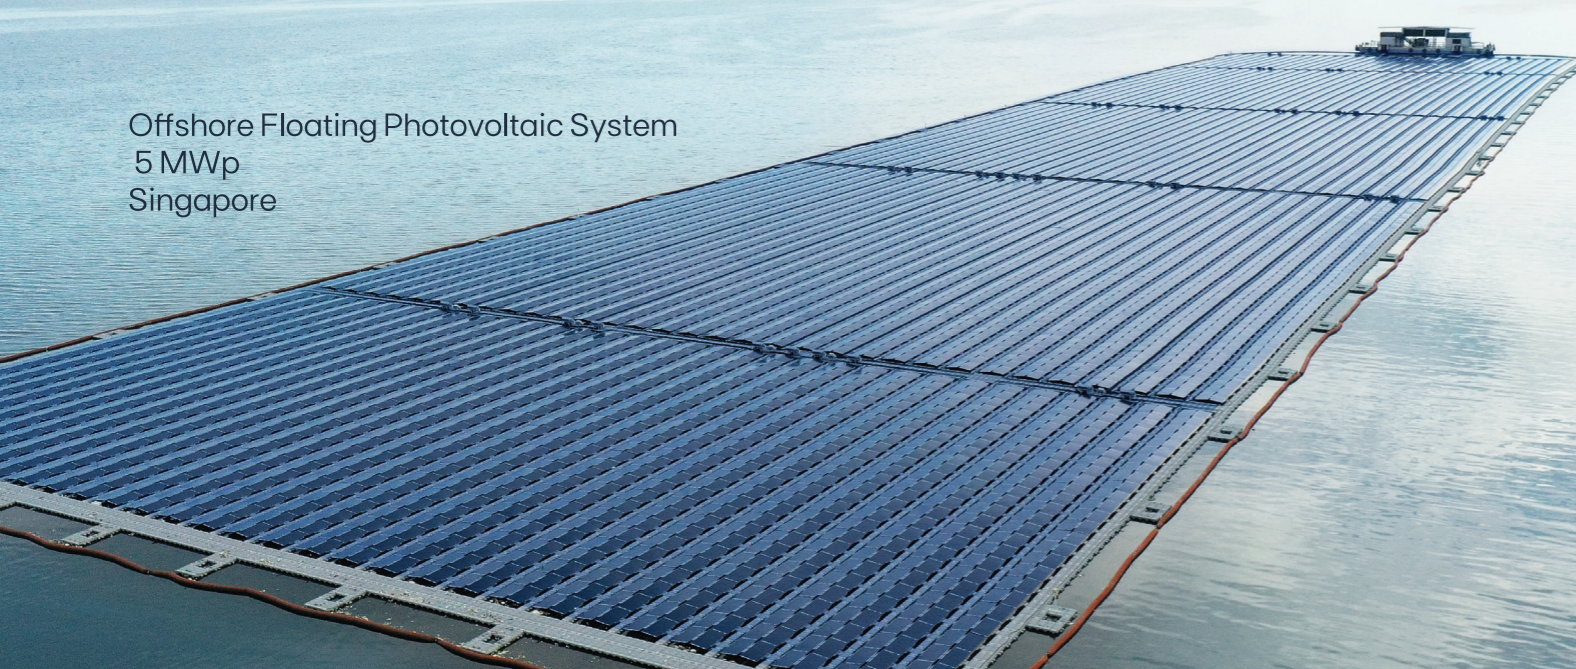

Energy Storage Systems

Virtual Power Purchase Agreement (VPPA)

Offshore Floating Photovoltaic System
5 MWp
Singapore

Cruz de Hierro Hybrid Wind and Solar Farm
28.76 MW
Spain

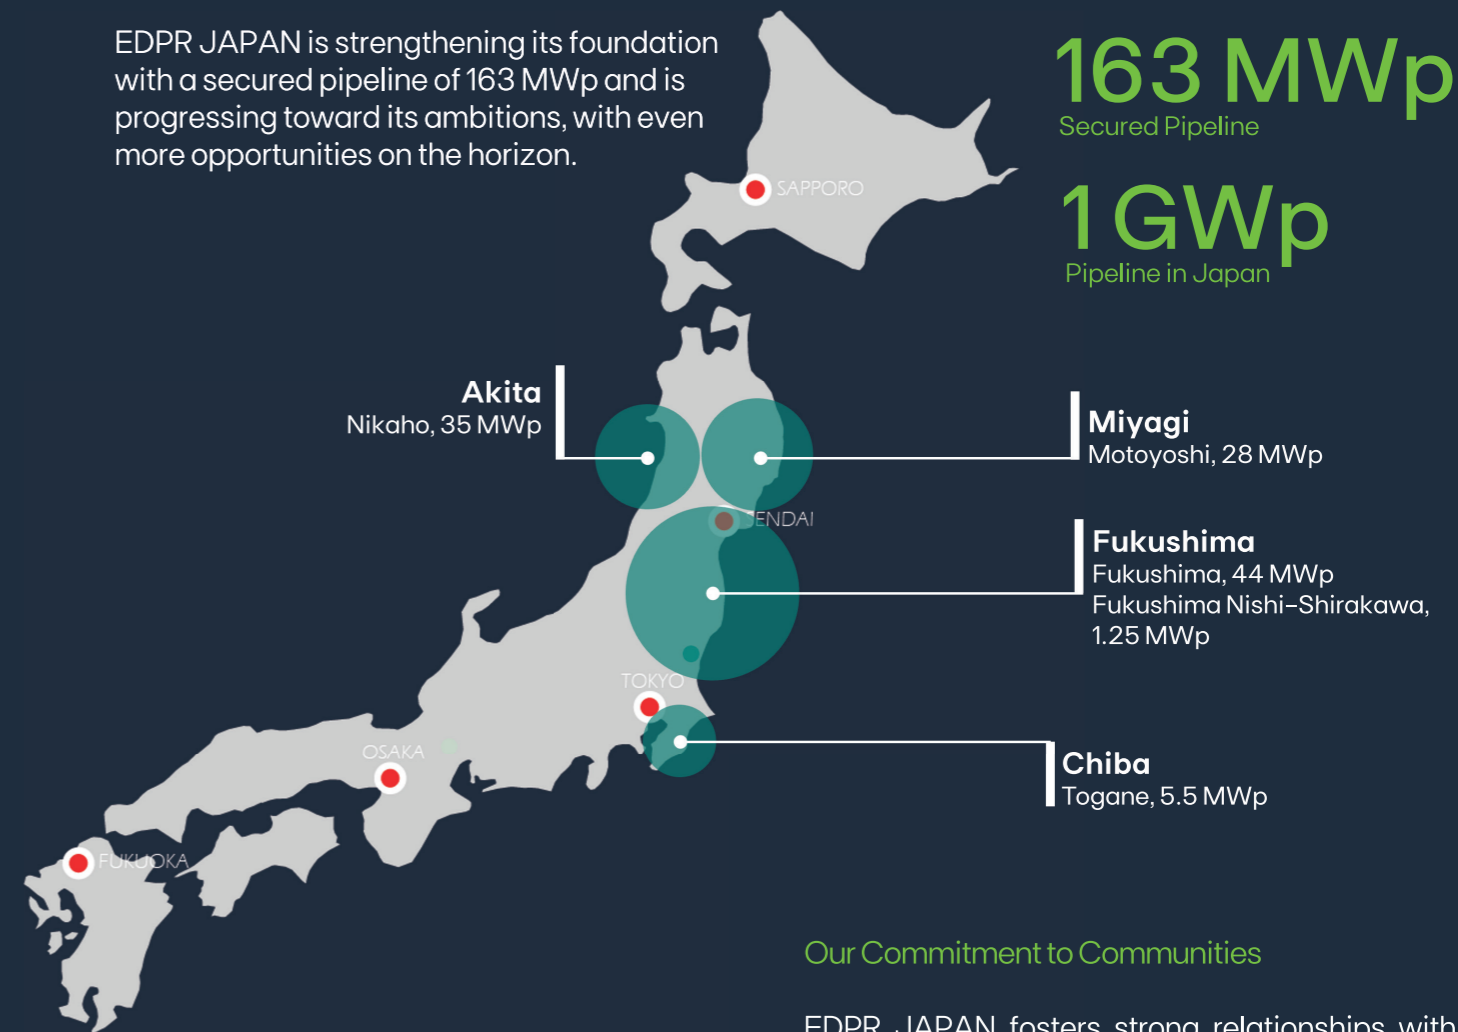

Pulau Ubin Micro-grid
Energy Storage System: 1 MWh | Solar PV System: 328 kWp
Singapore

About EDPR Japan

EDPR JAPAN, formerly known as RE CAPITAL K.K., was established in 2014. Today, EDPR JAPAN is a subsidiary of EDPR APAC. EDPR JAPAN focuses in:

- Ground-mounted grid-connected solar energy systems
- Onshore wind energy systems
- Battery Energy Storage System (BESS)

EDPR JAPAN is strengthening its foundation with a secured pipeline of 163 MWp and is progressing toward its ambitions, with even more opportunities on the horizon.

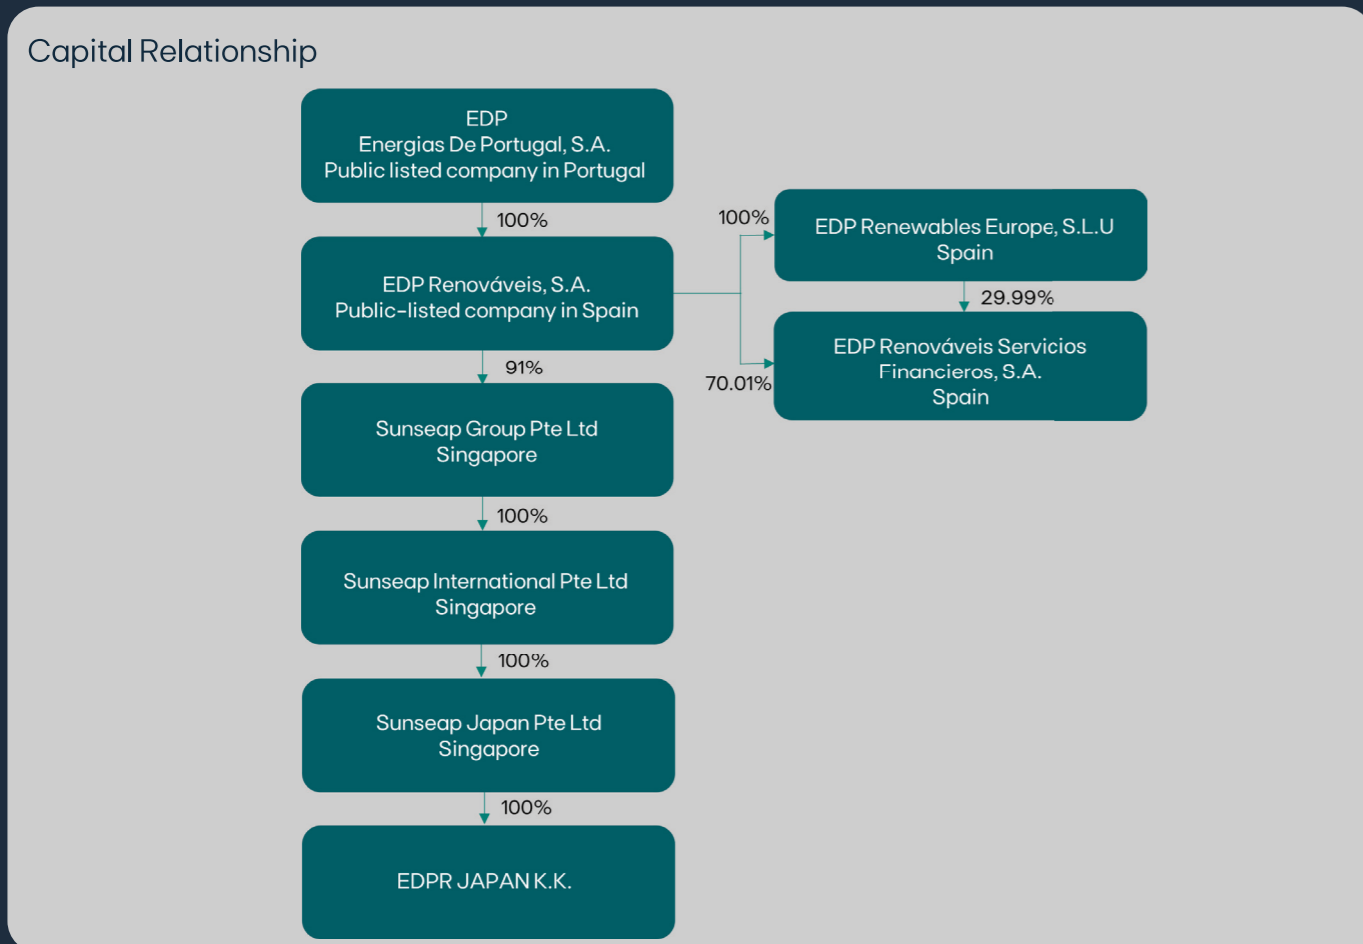

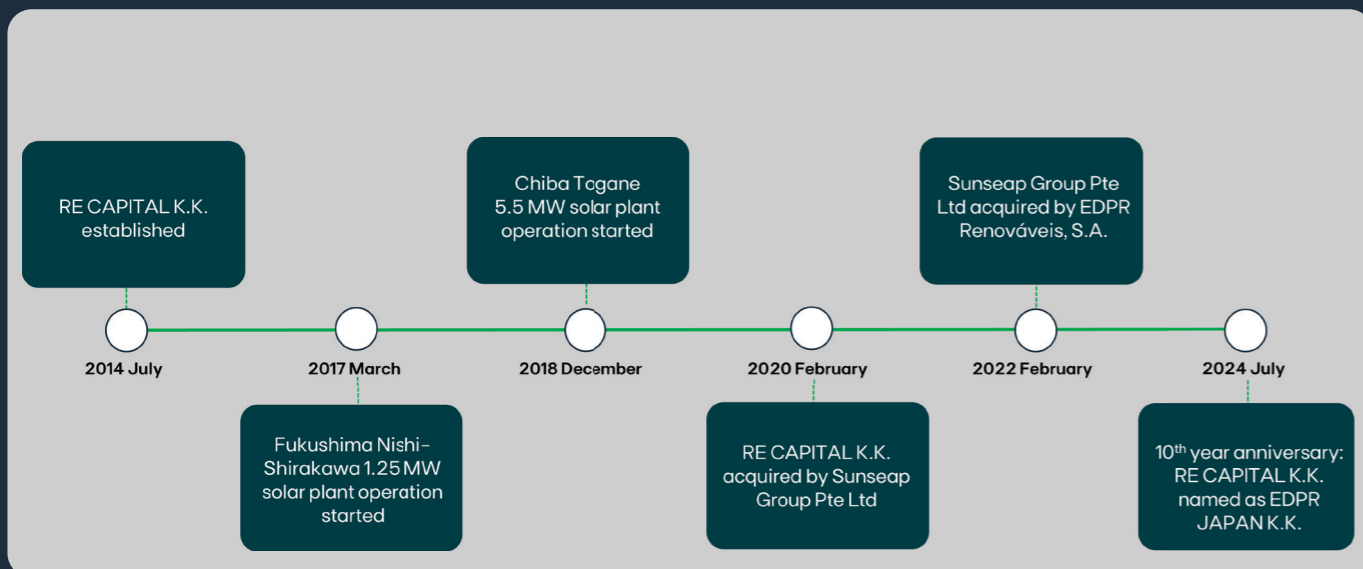

Our Commitment to Communities

EDPR JAPAN fosters strong relationships with communities wherever we operate. We engage stakeholders through inclusive and transparent communication, to seek input and ownership from a diverse range of voices.

Our Range of Services

- Investment – Equity contribution and customised contracting
- Engineering – Conducting detailed technical survey and customising project and technical specifications
- Project Management
- Operation and Maintenance
- Assets Management – Daily monitoring of assets performance

Our projects provide clean energy at affordable and predictable costs whilst driving economic growth, infrastructure improvements and regional regeneration, creating valuable short-term construction jobs and long-term operational positions. We are dedicated to fostering awareness and understanding of renewable energy through targeted education initiatives that inspire, educate and empower communities.
