

EBRD Environmental and Social Risk Categorisation List – Revised 2014

This checklist is designed to provide credit officers within Financial Institutions (FIs) with a guide to the typical level of inherent environmental and social risk related to particular business activities. This, in turn, should help, credit officers in judging the appropriate level of environmental and social risk assessment that should be carried out. A bank's actual exposure to financial, legal and reputational risks (stemming from environmental and social issues) will also depend upon other factors such as the nature and size of the transaction and the financial and managerial capacity of the company to effectively manage environmental and social issues. These factors should be taken into account when using this checklist. Refer to EBRD's industry sub-sectoral guidance documents which provide a summary of the environmental and social issues and risks associated with the industry concerned (www.ebrd.com).

The checklist may also prove valuable for reporting portfolio level exposures to particular industries, when completing the annual EBRD Sustainability Index.

Definitions

Environment	Environment refers to (i) any temporary or permanent changes to the landscape, atmosphere, soil, water, plants or animals caused by human activities.
Social	Social includes (i) labour standards and terms of employment (ii) community impacts such as public health, safety, security, gender equality, impacts on indigenous peoples and cultural heritage, land acquisition or potential reduction in people's livelihoods as a result of project activities (iii) occupational Health and Safety. It also includes disproportionate impacts on vulnerable groups/gender, involuntary resettlement, and affordability of basic services.
Overall	Overall rating reflects a balanced assessment of the combined environmental and social risks associated with the industry concerned.

High Activity Risk	The customer's business activities may give rise to significant or long-term environmental and social risks and impacts. These may require more specialised risk assessment, and the customer may not have the technical or financial means to manage them.
Medium Activity Risk	The customer's business activities have limited environmental and social risks and impacts, and these are capable of being readily prevented or mitigated through technically and financially feasible measures.
Low Activity Risk	The customer's business activities have minor / few environmental and social risk and impacts associated with them.
Category A	Developments on "greenfield" land, or major extension or transformation-conversion projects, which may give rise to significant or long-term environmental and social risks and impacts.

In addition to high, medium and low risk the list attached also shows further categories which include the following:

EBRD Excluded Activities

The following activities are typically EXCLUDED from financing using EBRD funds – check your agreement with EBRD for details

1. Production of arms or military equipment.
2. Production or export of tobacco products or hard liquor.
3. Casinos and other gambling facilities

In addition, EBRD has a specific Environmental & Social Exclusion List with further excluded activities which can be found in Appendix 1 of EBRD's Environmental & Social Policy.

Business activities are ranked according to the EU statistical classification codes NACE Rev. 2 (based on the Regulation (EC) No 1893/2006 of the European Parliament and of the Council, establishing the statistical classification of economic activities NACE Rev. 2, adopted on 19 December 2006).
